SUMMARY

Final year Economics and Politics student in the University of Limerick. I have a strong interest in Data Science/Analytics, and am proficient with many Python packages and other related technologies. I have research experience with Merriman Research & Training as an Assistant Genealogical and Historical Researcher.

Over the last four years I have focused my studies in the area of Industrial Economics, International Trade and International Relations. The summer before my final year I began to self-study programming, Data Science, Data Visualisation and some Computer Science fundamentals. During my Erasmus semester studying abroad in Belgium, I studied many different areas of business including Digital Marketing, International Marketing, Web Design, and European insurance.
